### Launch of our new VRM website

#### New design, new features

On December 18th 2012 we launched our new Victron Remote Management (VRM) website. This website is a free service provided by Victron to remotely monitor Victron equipment all over the world. The new website works on iPhone, Android and Ipad. Other important improvements can be found in our press release.

### 'Grid-to-go' unit powers outdoor

## events

To power outdoor events with green energy, Off Grid Energy built the 'Grid-to-go' unit. The Grid-to-go is a cleaner and silent solution than using a diesel generator. The Grid-to-go unit is fully equipped with Victron Energy: 24V 180Ah Lithium-ion batteries, 2 or 3 Quattro 48V 8kVA units that can supply single or three phase, Lynx boxes and several other products from Victron Energy.
