2025-11-23 23:47 1/1 Victron & Redflow ZBM

Victron & Redflow ZBM

Charge profile

- 1. Charge voltage 57.6V (up to 50 Amps per battery, and current per battery self-limits if you limit the voltage)
- 2. Linear charge all the way from empty to full (all charge phases are the same same 'flat' voltage).
- 3. No need for any sort of battery 'conditioning' cycling at all

Charger settings:

- 1. Set both absorption and float voltage to 57.6V
- 2. disable storage mode.
- 3. disable bulk protection(??)

Color Control GX
