

VRM JSON Juice API notes (draft)

API documentation is here: <https://juice.victronenergy.com/build/apidoc/>.

An example PHP file is here: [vrm_juice_php_example](#)

idDataAttribute vs code

When parsing results, do not use the idDataIn the commands, do not use the

Formatting values, and adding a unit (ie. V or W)

the API will reply with a format string, usable by many programming languages. For PHP see printf
