New: Blue Power Chargers with three outputs

Two new models have recently been added to our Blue Power Charger range: the 12V 25A and the 24V 15A model, both with three isolated outputs to simultaneously charge 3 battery banks. Each output is capable to supply the full rated current.

Off-grid, Back-up & Island systems

Recently we introduced a new brochure: Off-grid, Back-up & Island systems. This brochure contains information about several DC and AC systems with Victron Energy equipment. There are also a few application examples of existing installations with our equipment. The brochure ends with technical information about our solar products.

Horsetrucks equipped with Victron

Hungary - 'A competition horse can only perform well if it can enter the ring in top condition', says the Belgian businessman and horse-lover Stephan Center, owner of 'Stephex Horseboxes'. This company builds luxurious horseboxes, for the professional transport of

high end horses. The trucks are equipped with electrical systems from Victron Energy.

The Netherlands: New policecar

The Netherlands recently introduced a police car, with two big floodlights attached to a hydraulic pole. If an accident in the evening or at night happens, the floodlights can illuminate the area. The floodlights and the hydraulic pole are both powered by a system with a Victron MultiPlus and a 230 Volt generator.

Sweden: Nuclear Fuel mine

At the 'Aspo Hard Rock Laboratory' much of the research on the final repository for spent nuclear fuel is being done. In case of fire there is a rescue chamber 420 meter below ground, counted for 60 persons. A MultiPlus 24/3000/70 from Victron Energy is being used for emergency power to this chamber. The chamber can be provided of power for lights and air cleaning equipment for at least 6 hours.

Green Miles

The Green Miles is a project in which Arjen van Eijk and Florian Dirkse sailed around the world in two years, raising awareness on ocean climate. Victron Energy backs the Green Miles' aims and sponsored the project by providing an on-board sustainable energy supply. During the project they worked on a documentary. From the 22th of May, 8 episodes of the documentary will be shown on Dutch National Television (The AVRO, Netherlands 3, every Sunday 19.50).
