

Victron at Boot Dusseldorf 2005

For anyone having anything to do with boats or the boating business, Boot Düsseldorf is the place to be. With 103.000 net square meters of exhibition space, representation from over 50 countries and more than 70 exhibitors of super yachts, there is enough to be seen at this year's fair.

Victron Energy has this year been represented by Fischer Panda, Buch Bremer and Engels und Kieth GmbH. With presentation walls demonstrating the possibilities of integrating Victron Energy products into a complete system, the visitors could experience what happens when turning on several household devices without creating an overload.

Fisher Panda meets Victron Energy

What happens when turning on the hair dryer, while my husband is watching TV?.....

Phoenix Multi Plus on a Fisher Panda generator

Besides marine equipment, there were the boats. Famous names such as Ferretti, Sunseekers, Nautors Swan, Rodman, Najad, X-Yachts and many more showed with pride their boats and super yachts. And admit it yourself: who wouldn't want to sail such beauties?...

Wouldn't you want to sail these ones?
