

## Victron Energy at HISWA 2005

*Despite bad weather and, as a result, transport and traffic problems the 50<sup>th</sup> edition of the HISWA has yet again been successful. The show, held at the Amsterdam RAI center, attracted this year over 68.000 visitors.*

This year's show hosted 400 exhibitors and hundreds of boats of different models and sizes. Despite the slow start of the show due to heavy snow falls and traffic problems the number of visitors has been higher than expected. After the opening of the show by Prince Willem Alexander, the visitors could enjoy a festive program created around the 50<sup>th</sup> anniversary of the show.

Victron Energy could not complain about the number of visitors at its booth. With a 'stylish' presentation of the product range and two flatscreen TV's showing the PowerControl and PowerAssist features of the MultiPlus, Victron Energy could not be missed. As an addition, the visitors could watch a special feature of the TV program Yacht Vision dedicated to the functionality of the Phoenix MultiPlus.
