

Schroders London Boat Show 2005

The 51st annual Schroders Boat Show has yet again been a successful one for Victron Energy. The show, at its second edition at the modern ExCel venue in the heart of London's Docklands attracted this year over 150.000 visitors. More than 800 exhibitors from the boating and water sports world presented over 1000 boats and craft.

Victron Energy presented at its booth the practical possibilities of the Phoenix MultiPlus inverter/charger combination. With the introduction of the newest model, the Phoenix MultiPlus 2000 VA, the range has now been completed and is one of the largest available on the market.

The presentation walls showed a full range of new products such as the Multi Compact, the small version of the Phoenix Multi and the newest range of compact chargers and inverters.

"We can again speak of a successful Schrodgers Boat Show this year, said Danny Jones, UK area manager for Victron. Despite the slow start of the show due to bad weather and traffic problems the number of visitors at our booth has been surprisingly high. We had a lot of positive reactions and interesting new contacts have been established. The English market is still a growing one; this means that there are enough opportunities for us to expand our activities".
