

## Victron Energy launches new Victron Remote Management website

[www.victronenergy.com](http://www.victronenergy.com)

**Press Release** Almere, December 27th 2012

**On Tuesday December 18<sup>th</sup> Victron Energy launched the new Victron Remote Management (VRM) website. This website is a free service provided by Victron Energy to remotely monitor Victron equipment all over the world. One of the new features of this website is that it now works on iPhone, Android and iPads.**

### Responsive and new design

The new VRM website is completely redesigned. On the homepage the user will see an overview of all sites in his or her account, with their current status. Thanks to the responsive design the website will resize automatically to provide an optimal viewing experience on different sized displays: from small iPhones to large desktop screens.

### Alarms

The new website has a completely new and extensive alarm system. The website will continuously monitor if the configured Victron installations are still online and reporting. As soon as they go offline, for example due to telecommunication problems, the user will be alerted by email. The user can also configure thresholds on all logged parameters, for example input voltages and battery state of charge.

### Prepared for the future

Victron is currently working on a new generation of Global Remotes that can also log information from the MPPT Solar Chargers and other products. The new VRM website is already set for this new feature.

### And there is more to come:

In the future the VRM website will be further refined: based on the type of installation of the user, only the most relevant information will be shown to improve the usability.

### View the new VRM website

To experience all the new features of the VRM website, visit <https://vrm.victronenergy.com/user/login>  
You can use the demo version by clicking on 'Take a look inside'.

### Profile Victron Energy

Electrical power specialist Victron continually develops new solutions for energy use in diverse situations.
