

After mounting the MountingPlate to the wall
Notice the bottom hooks extend more then the other hooks (A).
Next notice the traingular cut-outs (B) at the back of the unit.

A						<p>Next when lifting the unit, ①tilt the unit a bit and place the triangular cut-out over the Extended bottom hooks. When they wedge in place tilt the unit up ②leaving the cut-outs pushed against the hooks. After the unit is flush with the mountingplate ③ lift de unit up about 3cm ④ while pushing it towards the wall ⑤. The other hooks wil snap in place and the unit can be lowered in place. Finaly put the screws in place to secure the unit to the mounting plate! ⑥</p>
